Paid for by Missourians Against Human Cloning - Dan Shipley, Treasurer

"As much as proponents may deny it, this initiative would create a constitutional right to do human cloning in the state of Missouri. Human cloning does not belong in our constitution. The initiative would also prevent the Legislature from restricting funding for human cloning and embryo research. In other words, the initiative would create a right to clone and kill human embryos, and it would require all of us to pay for it."

Washington University School of Medicine
